

Sprint 4

Team ID:

PNT2022TMID48235

Team Mates:

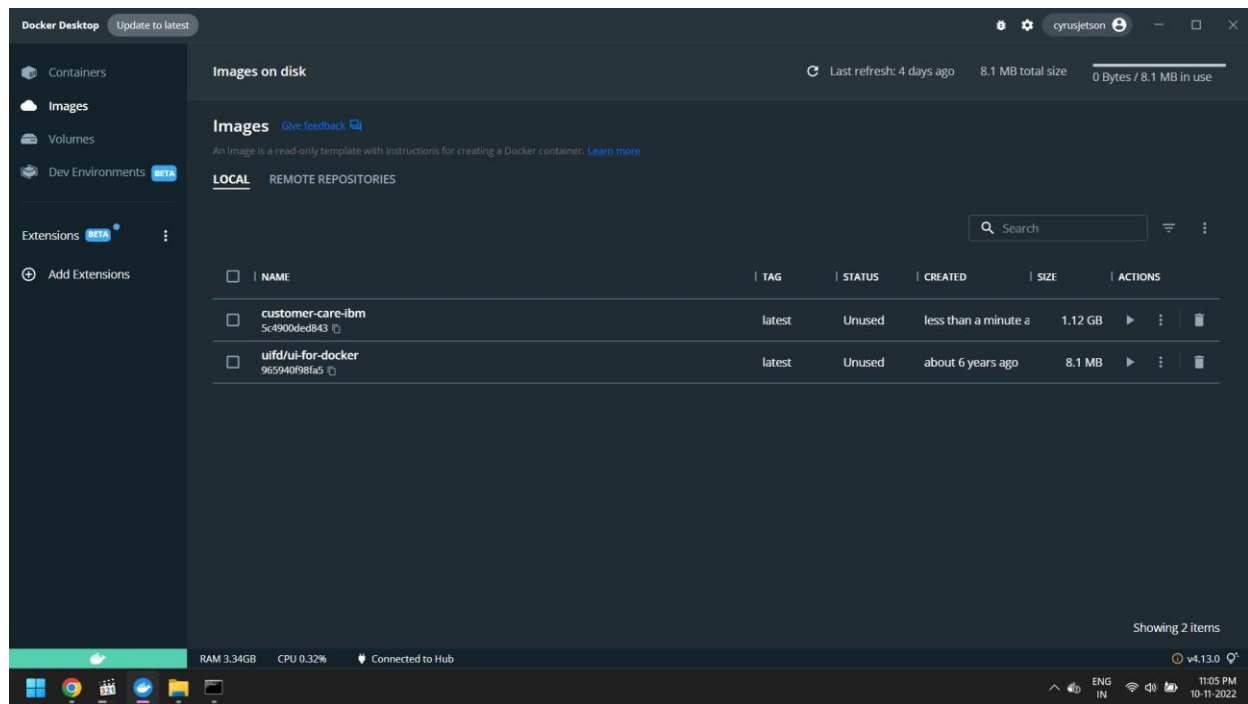

1. Saran R(TL)
2. Sabarinath GD
3. RISHI RAGUL GR
4. Prakash Raj D

Sprint 4:

1. Containerize the flask app
2. Upload in docker hub
3. Building Image
4. Pushing docker image
5. Running on Docker playground
6. Setting up container registry
7. Uploading image in container registry
8. Deploy in Docker

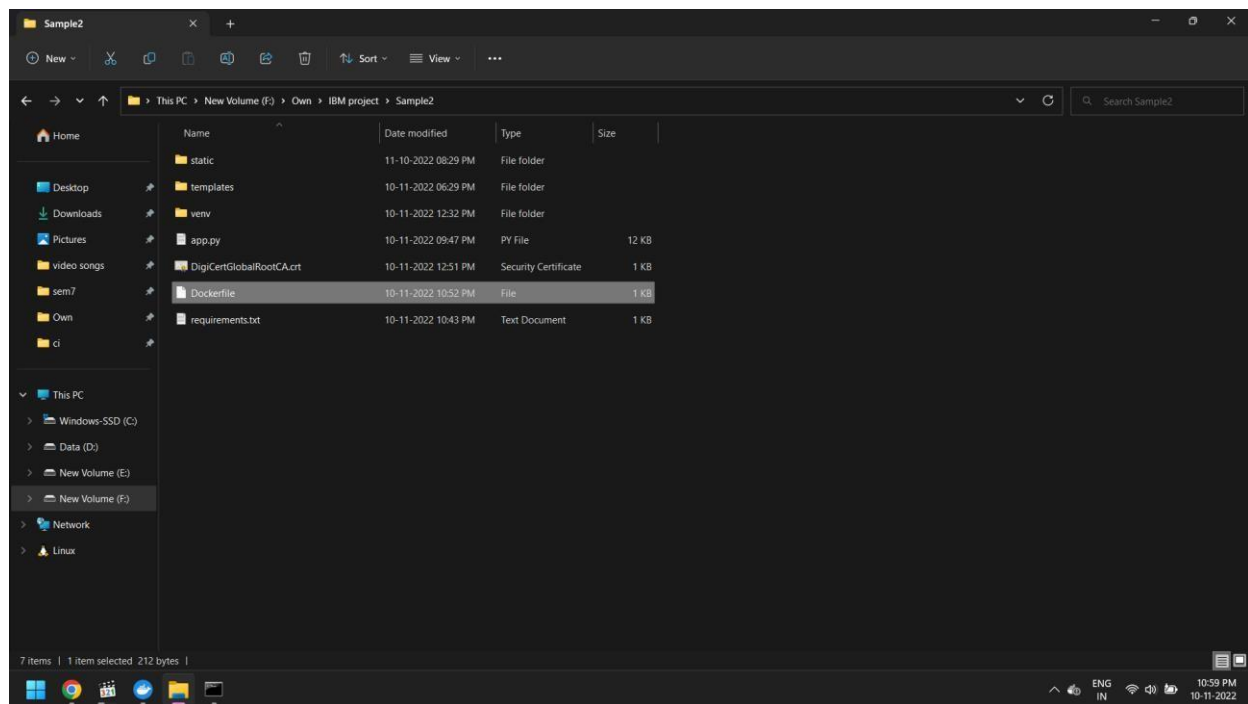

Output :

1. Containerize the app:

```

2.Upload in docker hub

The screenshot shows the Docker Hub interface for the repository `cyrusjetson/customer-care-ibm`. The page includes a search bar, navigation tabs (General, Tags, Builds, Collaborators, Webhooks, Settings), and a description field. The description field is currently empty, with a prompt to "Add a short description for this repository". The "Tags and scans" section shows "VULNERABILITY SCANNING - DISABLED" with an "Enable" link. The "Automated Builds" section provides instructions on how to connect the repository to GitHub or Bitbucket for automated builds.

```
C:\Windows\System32\cmd.exe - docker build -t customer-care-ibm .
--severity string    Only report vulnerabilities of provided level
                    or higher (low|medium|high)
--token string       Authentication token to login to the third
                    party scanning provider
--version            Display version of the scan plugin
'docker scan' requires exactly 1 argument

5. Running on Docker playground

The screenshot shows the Docker Playground interface in a web browser. The top navigation bar includes links to IBM Cloud Container Registry, Docker Hub, and the current playground session. The main area displays the container details for 'cdmjrae3_cdmjrce3tccg009qdm3g'. The container is running on IP 192.168.0.28 with 30.21% memory usage (1.18GiB / 3.906GiB) and 139.31% CPU usage. The SSH command is 'ssh ip172-18-0-28-cdmjrae3tccg009qdm2g@direct.labs.pla'. Below the details, a terminal window shows the command 'docker pull cyrusjetson/customer-care-ibm' being executed, with output indicating the image is being pulled from the repository and the layers are being downloaded.

7. Uploading image in container registry

The screenshot shows the IBM Cloud Container Registry web interface. The left sidebar contains navigation links: Container Registry, Quick start, Namespaces (1), Repositories (1), Images (1), Trash (0), and Settings. The main content area is titled 'Repositories' and shows a list of repositories. The 'customer-care-ibm' repository is selected, showing details for the 'latest' tag.

Name	Image count	Namespace	Last updated
customer-care-ibm au.icr.io/customer-care-ibm/customer-care-ibm	1	customer-care-ibm	1 hour ago

Digest	Manifest type	Tags	Created	Size	Security status
396f2b181a98	Docker	latest	1 hour ago	487 MB	Unscanned

Items per page: 25 | 1-1 of 1 item

8. Deploy in Docker
